Pertemuan 2 : MVC (Model View Control) di PHP

1. Buat program contoh MVC berikut :

Model/book.php

```
<?php
class Book {
    public $title;
    public $author;
    public $description;

    public function __construct($title, $author,
$description)
    {
        $this->title = $title;
        $this->author = $author;
        $this->description = $description;
    }
}
?>
```

Model/model.php

```
<?php
include_once("model/Book.php");

class Model {
    public function getBookList()
    {
        // here goes some hardcoded values to simulate the database
        return array(
            "Jungle Book" => new Book("Jungle Book", "R. Kipling", "A classic book."),
            "Moonwalker" => new Book("Moonwalker", "J. Walker", ""),
            "PHP for Dummies" => new Book("PHP for Dummies", "Some Smart Guy", "")
        );
    }
    public function getBook($title)
    {
        // we use the previous function to get all the books
        // and then we return the requested one.
        // in a real life scenario this will be done through
        // a database select command
        $allBooks = $this->getBookList();
        return $allBooks[$title];
    }
}
?>
```

view/viewbook.php

```
<html>
<head></head>
<body>
    <table>
        <tbody>

<tr><td>Title</td><td>Author</td><td>Description</td></tr>
        </tbody>
        <?php

            foreach ($books as $book)            {
                echo '<tr><td><a href="index.php?book=' .
                    $book->title . '">' . $book->title .
'</a></td><td>' .
                    $book->author . '</td><td>' . $book-
>description . '</td></tr>';
            }
        ?>
    </table>
</body>
</html>
```

view/booklist.php

```
<html>
<head></head>
<body>
    <?php

        echo 'Title:' . $book->title . '<br/>';
        echo 'Author:' . $book->author . '<br/>';
        echo 'Description:' . $book->description . '<br/>';

    ?>
</body>
</html>
```

controller/controller.php

```
<?php
include_once("model/Model.php");

class Controller {
     public $model;

     public function __construct()
     {
          $this->model = new Model();
     }

 public function invoke()
{
          if (!isset($_GET['book']))
          {
               // no special book is requested, we'll show a
list of all available books
               $books = $this->model->getBookList();
               include 'view/booklist.php';
          }
          else
          {
               // show the requested book
               $book = $this->model->getBook($_GET['book']);
               include 'view/viewbook.php';
          }
     }
}
?>
```

index.php

```
<?php

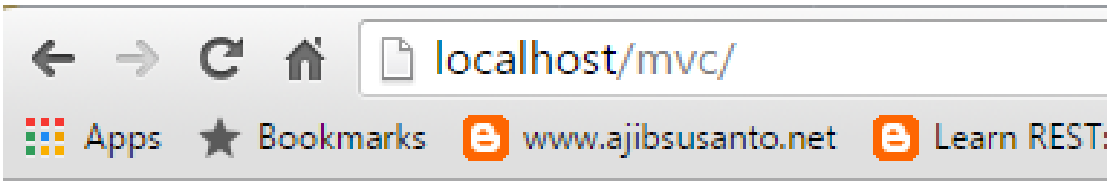

// All interaction goes through the index and is
forwarded
// directly to the controller

include_once("controller/Controller.php");

$controller = new Controller();
$controller->invoke();

?>
```

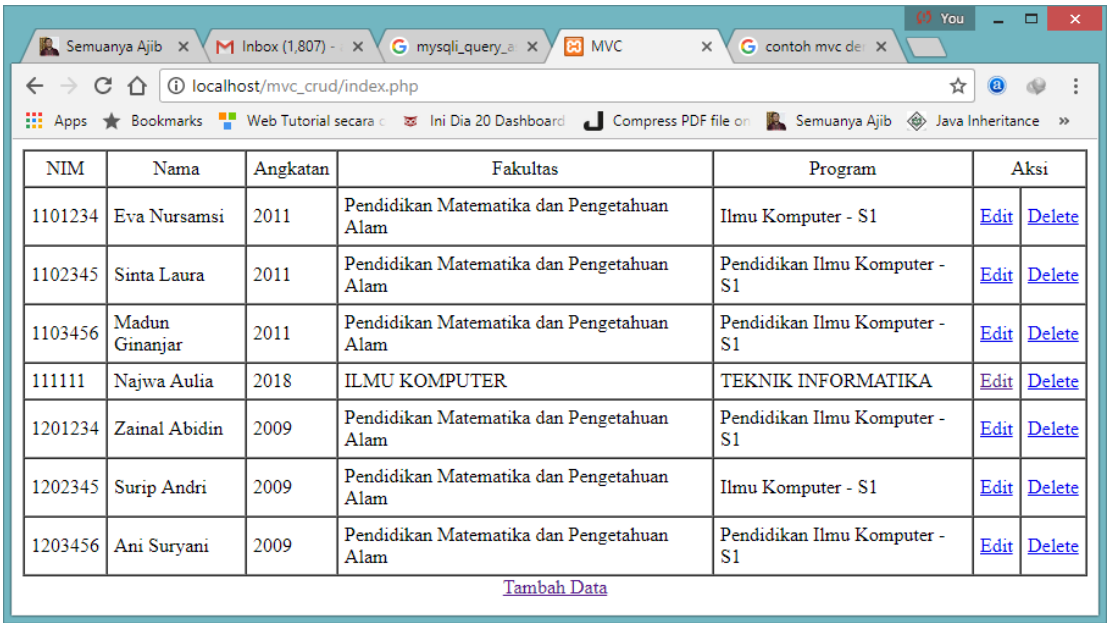

Hasil :

Title	Author	Description
Jungle Book	R. Kipling	A classic book.
Moonwalker	J. Walker	
PHP for Dummies	Some Smart Guy	

2. Contoh MVC CRUD, silahkan download di Drive di folder tugas, jalankan dan pastikan program dapat berjalan dengan normal. Hasil program seperti berikut :

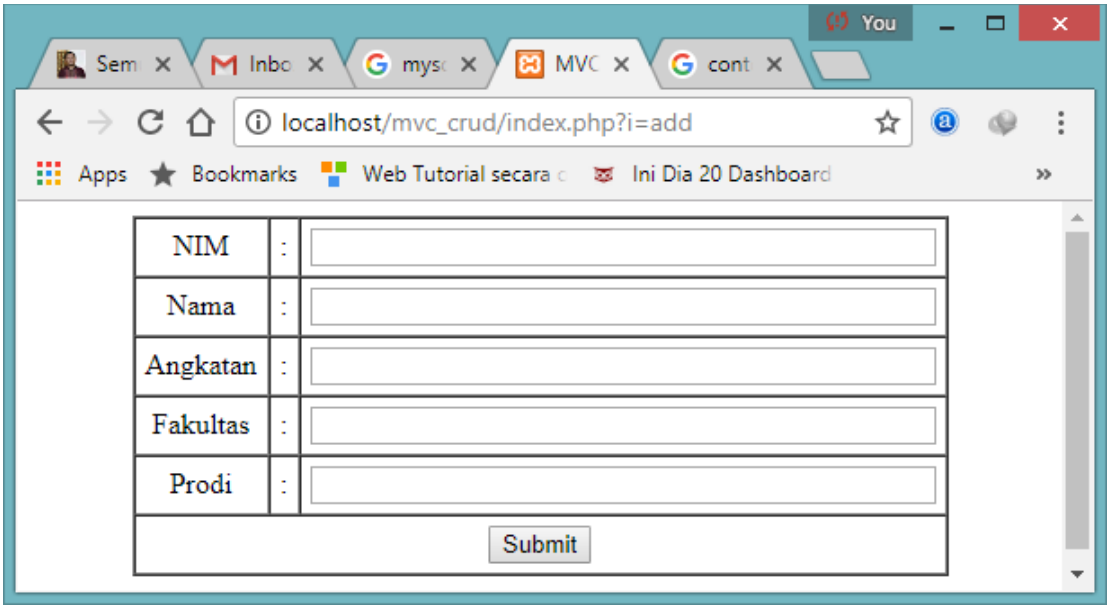

Display Data :

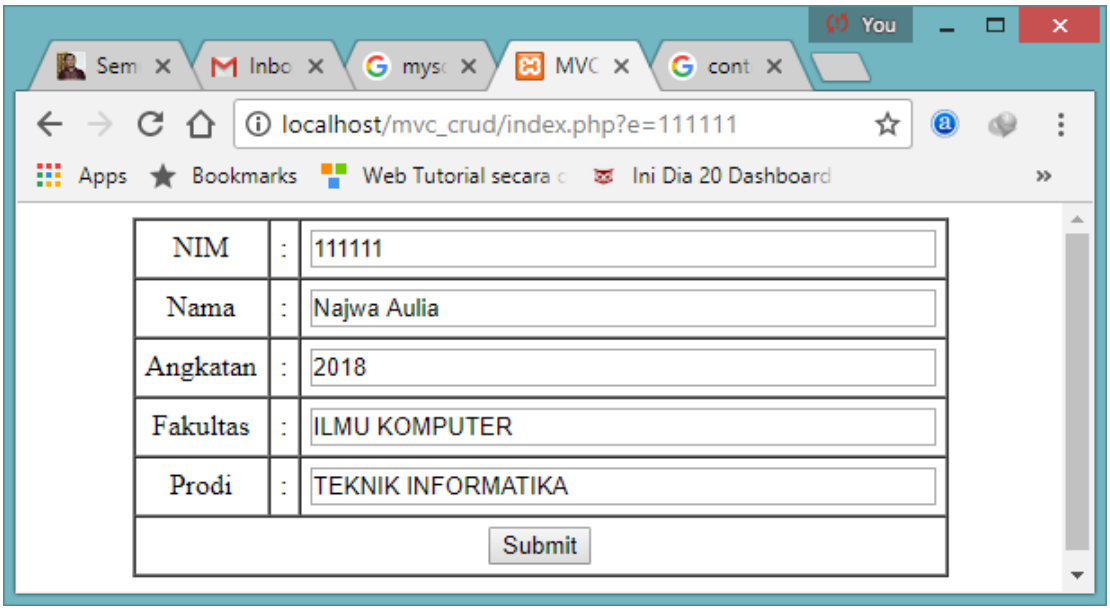

NIM	Nama	Angkatan	Fakultas	Program	Aksi	
1101234	Eva Nursamsi	2011	Pendidikan Matematika dan Pengetahuan Alam	Ilmu Komputer - S1	Edit	Delete
1102345	Sinta Laura	2011	Pendidikan Matematika dan Pengetahuan Alam	Pendidikan Ilmu Komputer - S1	Edit	Delete
1103456	Madun Ginanjar	2011	Pendidikan Matematika dan Pengetahuan Alam	Pendidikan Ilmu Komputer - S1	Edit	Delete
111111	Najwa Aulia	2018	ILMU KOMPUTER	TEKNIK INFORMATIKA	Edit	Delete
1201234	Zainal Abidin	2009	Pendidikan Matematika dan Pengetahuan Alam	Pendidikan Ilmu Komputer - S1	Edit	Delete
1202345	Surip Andri	2009	Pendidikan Matematika dan Pengetahuan Alam	Ilmu Komputer - S1	Edit	Delete
1203456	Ani Suryani	2009	Pendidikan Matematika dan Pengetahuan Alam	Pendidikan Ilmu Komputer - S1	Edit	Delete

Tambah Data

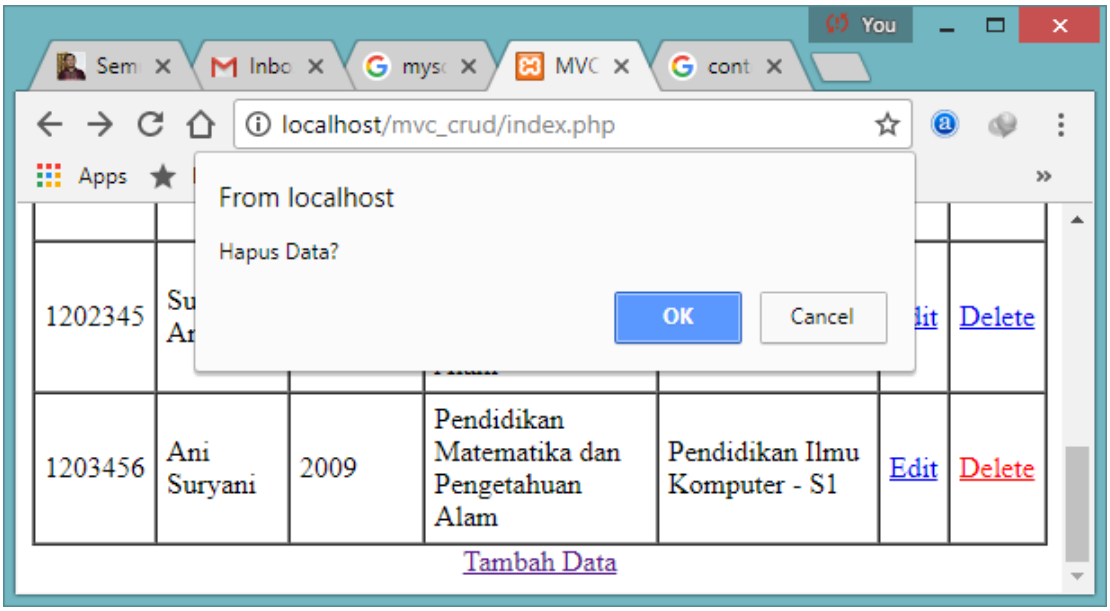

Tambah Data :

Edit Data :

Hapus Data :

3. Install Laravel di localhost dan buat dokumentasinya!
4. Buatlah makalah *Architectural Patterns dalam Pengembangan Aplikasi Web*!. Hasil makalah upload di drive masing-masing !.
